

AMSS 2026 — Lecture 14: Final Presentations

Traian-Florin Șerbănuță

2026

Today: Finals + Reflection

The last session, shared with **Lab 7**:

1. A short look back at the semester.
2. **Reflection:** what AI got right and wrong.
3. **Final presentations + per-student cold defense** (Lab 7).

The defense mechanics are in the Lab 7 brief; today's lecture portion is the wrap and the reflection.

The Semester in One Line

You learned to be the **architect and critic** of an AI-mediated design:

- ▶ **Architect** — drive AI through the SDLC.
- ▶ **Critic** — read its output and name what's wrong.

Every week built one piece of that.

The Arc We Walked

Each stage: drive AI, read critically, correct, trace forward.

The Floor: F1 + F3 + F4

The literacy floor you can demonstrate **unaided**:

- ▶ **F1** — read & critique any AI artifact on the spot.
- ▶ **F3** — articulate why you directed AI a certain way.
- ▶ **F4** — defend traceability end to end.

These are what the defense grades — and what AI can't do for you.

What the Course Actually Built

Not UML for its own sake. Not prompt tricks.

It built the **human evaluator** — the judgement AI is worst at: completeness, correctness, and whether the design really fits the domain (W11).

That judgement is yours, and it's the point.

Reflection: What AI Got Right

In your teams, name where AI **helped** most this semester:

- ▶ Where did it accelerate you?
- ▶ What did it get right that would have taken you far longer alone?

Reflection: What AI Got Wrong

And where it **failed** — and your critique caught it:

- ▶ A fabricated message, a wrong multiplicity, an overused pattern, a broken trace.
- ▶ One concrete example per team.
- ▶ What would you direct differently next time?

Now: The Defense (Lab 7)

Team presentations, back to back, then your **per-student cold defense** — graded, unaided.

Present the **trail**, not just the artifacts. Read aloud, give reasons, walk your trace. Defend the work that's yours.

Thank You

You drove AI through a whole system, caught what it got wrong, and can defend every choice.

That's the skill that lasts. Good luck with your defenses — and beyond.
